The goal of the **MultiFakeVerse** database is to develop new techniques, technology, and algorithms for context-aware deepfake detection and localization, as most of the existing research focuses on low-level GAN or diffusion inpainting based manipulation detection. With the advent of personalized image editing algorithms, more advanced forms of intent-based deepfake manipulations are possible, necessitating the need to improve the deepfake detection methods for such content.

The licensors are involved in an ongoing effort to strengthen detection algorithms against highly realistic deepfakes. The dataset is meant to aid research efforts in the general area of developing, testing and evaluating algorithms for deepfake detection and localization.

To receive a copy of the dataset, the requestor must agree to observe the conditions listed below.

The goal of the **MultiFakeVerse** database is to develop new techniques, technology, and algorithms for predicting and locating where an image has been manipulated.

Use is permitted of the database and annotations above in source and binary form, provided that the following conditions are met:

- The database is provided under the terms of this license strictly for academic, non-commercial, not-for-profit purposes.
- Redistribution, republishing, or dissemination in any form, source or binary, is not permitted without prior written approval by the licensors. Linking to the webpage of the database (https://huggingface.co/datasets/parulgupta/MultiFakeVerse) is permitted.
- The names of the licensors may not be used to endorse or promote products derived from this software without specific prior written permission.
- The licensors reserve the right to modify the data/license at any point. Modification of the database by licensees is not permitted.
- In no case should the images be used in any way that could cause the original subject embarrassment or mental anguish.

• You understand that the MultiFakeVerse dataset is a deepfake dataset generated based on four real image datasets: PIC (Liu et al.), PISC (Li et al.), PIPA (Zhang et al.) and Emotic (Kosti et al.). You must agree to all the conditions of access specified by each of these datasets.

• You certify that you have requested the access to the Emotic Dataset from its official source and agreed to all its access conditions here: https://github.com/rkosti/emotic.

• You certify that you have requested the access to the PIPA Dataset officially and agreed to all its access conditions.

• You certify that you have requested the access to the PISC Dataset officially and agreed to all its access conditions here: https://zenodo.org/records/1059155.

• You certify that you have requested the access to the PIC Dataset officially and agreed to all its access conditions here: https://opendatalab.com/OpenDataLab/PIC.

• The authors of the dataset make no representations or warranties regarding the dataset, including but not limited to warranties of non-infringement or fitness for a particular purpose.

• You accept full responsibility for your use of the dataset and shall defend and indemnify the Authors of MultiFakeVerse, against any and all claims arising from your use of the dataset, including but not limited to your use of any copies of copyrighted images that you may create from the dataset.

• Any publications arising from the use of this software, including but not limited to academic journal and conference publications, technical reports and manuals, must cite the following works:
